DMITRIJ ABOLICHIN

Vilnius, Lithuania | d.abolichin at gmail.com | https://abolich.in

As a tech-savvy engineering leader, solving complex problems and improving the human experience through software is my passion. I am constantly pushing the boundaries of what is possible by utilizing cutting-edge technologies and practices, with a focus on quality and automation. My drive for continuous improvement ensures that I am always learning and applying new knowledge to push the limits of software engineering. I am a firm believer that technology has the power to make this world a better place, and I am dedicated to using my skills to make a meaningful impact.

Let's code the future together!

WORK EXPERIENCE

Kilo Health

Director of Engineering | Sep 2022 - Current

Kilo Health is one of the leading digital health and wellness companies globally.

I am leading the Engineering Guilds @ Kilo Health (Backend, Frontend, Mobile, QA, Infra, IT & Admin) and core teams around them.

TransferGo

Director of Engineering | Jul 2022 - Sep 2022

TransferGo is a company that provides a range of financial services to its customers, with a strong focus on peer-to-peer money transfers.

I was leading the Engineering teams of the Compliance, FinCrime and Ops domains.

Vinted

Director of Engineering | Feb 2020 - May 2022

Vinted is an online marketplace and community that allows its users to sell, buy, and swap secondhand clothing items and accessories.

As a Director of Engineering at Vinted I was responsible for:

- Leading the Engineering of Trust domain
- Owning of high-level technical vision

- Managing the delivery quality, risk, issues, blockers
- Cultivating Continuous Learning and Improvement culture
- Growing high-performing teams and hiring talents

Engineering Team Lead | Aug 2018 - Feb 2020

As an engineering team lead at Vinted I was responsible for:

- Leading and growing the Trust & Safety cross-functional engineering team
- Scaling the security, community support and content quality services to support 30M+ registered members
- Contributing to make the second-hand first choice worldwide as a backend developer

TripCreator

Software Developer | Jun 2016 - Aug 2018

TripCreator is a powerful and time-saving itinerary building software for anyone who needs to create and share customized itineraries. The platform is beneficial to travel agencies, DMC's, tour operators and airlines for simplifying and automating processes for itinerary creation, leading to better customer engagement with the customer and higher conversion rates.

As a Software Engineer at Tripcriator I was:

- Building a smart tool for creating beautiful custom-made Itineraries with hotels, car rentals, tours and pois in one place
- Implementing the integrations with travel industry giants

The technology stack we had at TripCreator: Scala, Akka, Akka cluster, Redis, Elasticsearch, Kafka, PostgreSQL, React.js, Node.js running on Kubernetes in Google Cloud Platform

Storebrand

ECM Group Leader | Mar 2014 - Jun 2016

Storebrand is a leading player in the Nordic markets for pensions, life and health insurance, banking and asset management. Storebrand ECM (Enterprise Content Management) group is responsible for providing services for Storebrand's documents production, content management, distribution to customers, documents storage and search.

In Storebrand I was leading ECM Baltic team's operations & delivery and was responsible for technical implementation and maintenance of ECM platform which was a key factor for digitizing and automating documents production in Storebrand.

My responsibilities included:

- Leading the development of ECM Platform - distributed documents production pipeline involving integrations with core systems and third-party distribution channels

- Managing cross-functional team of Java, .NET and document developers and business analysts
- Assisting in recruitment processes and Storebrand Baltic IT build-up
- Assisting in establishing best management practices in Storebrand Baltic IT
- Optimizing cross-country operational model
- Adopting agile culture (Scrum, Kanban, XP) and frameworks in ECM group
- M&A due diligence

Technologies we used in ECM group: Java, Spring, RxJava, Hystrix, HTML, Javascript, RxJs, Polymer, JPA & Hibernate, Maven, Gradle, Git, MongoDb, Couchbase, Oracle 11, MS SQL, Jira, Bamboo, Puppet

EIS Group

Lead Systems Architect | Sep 2013 - Mar 2014

EIS Group provides capabilities and solutions to insurers that enable growth and help them meet their goals for operational and cost efficiency.

In EIS Group I was responsible for design and architecture of new EIS Solution module - Commercial Lines Insurance. My responsibilities included:

- Performing business requirements analysis
- Leading implementation of Commercial Lines POC solution
- Designing the architecture for the Commercial Lines solution

Tech stack we used in Exigen Services: Java, Spring, Servlets, JSF/Facelets, RichFaces, HTML, Javascript, JQuery, Spring Web Flow, JPA & Hibernate, Maven, SVN, Eclipse, Netbeans, Oracle 10/11, MS SQL, SQL, XML, XSD, Soap WS, RESTful WS, JUnit, Selenium, Mockito, Jira, Bamboo, Hudson/Jenkins, Sonar, Mercurial

FICO

Solutions Integration Lead Consultant | May 2013 - Sep 2013

FICO is a leading analytics software company, helping businesses in 90+ countries make better decisions that drive higher levels of growth, profitability and customer satisfaction.

In FICO I have implemented few integrations for predictive analytics solutions in few EMEA region Banks. My responsibilities at Fico included:

- Designing integration solutions
- Integrating solutions into customer's environment
- Customizing legacy FICO solutions to support customer requirements (both back-end and front-end)
- Supporting and consulting customers about FICO solutions
- Mentoring junior colleagues

Tech stack used in projects I have contributed to: J2EE, Spring, Spring Batch, Spring Integration, Servlets, JPA & Hibernate, Maven, SVN, Eclipse, Oracle 10/11, MS SQL, DB2, Websphere Integration Developer, Websphere Process Server, SQL, XML, XSD, Web Services, HTML, Javascript

Exigen Services Lietuva

Systems Architect | Apr 2008 - May 2013

Exigen Services (re-branded later to EIS) is a global technology services firm. It provides technology consulting, systems integration and commercial software solutions. Lithuanian Branch was responsible mainly for Insurance Solutions.

In Exigen Services I was leading the team which successfully implemented and maintained new core component - Product Factory. This component became one of the main selling points for Insurance solution. Product is used by insurance companies all over the world (Chartis, AAA, NBIC, Hollard, AMI, etc.).

My responsibilities at Exigen Services included:

- Defining system design and architecture
- Leading POC solution implementation
- Leading the team of Java developers and testers
- Leading front-end and back-end implementation
- Communication between dependent project teams
- Adopting Agile frameworks and practices (Scrum, Kanban, XP) in day-to-day operation
- Acting as Product Owner Proxy and specifying User stories (both technical and non-technical)
- Project management

Tech stack we used in Exigen Services: Java, Spring, Spring Web Flow, XML/XSD/SOAP/WSDL, JSF/Servlets, RichFaces, JPA & Hibernate, Maven, SVN, Mercurial, Jira.

Informacinių Projektų Sistemos

Developer, Team leader | Nov 2003 - Apr 2008

Informacinių Projektų Sistemos (IPS) was a small Lithuania company offering insurers agile and feature-rich insurance solution for Policy and Claims administration (both P&C and Life insurance) - DIS. Product was used by leading Lithuanian and Latvian insurance companies (ERGO LT, ERGO LV, PZU LT).

I have started in IPS as a developer responsible for variety of inner components and moved later to leading small team of developers and acting as a main customers' contact for technical details. IPS was merged with Assecco Lithuania some time afterwards.

In IPS I have:

- Implemented and maintained key parts of Insurance solution - DIS

- Integrated Insurance solution with third-party vendors
- Supported and consulted customers on daily basis
- Performed analysis of customers' requirements
- Specified requirements for later feature development
- Was planning the releases
- Managed small team of developers and testers

Tech stack used in IPS: Java, Gupta SQLWindows, Oracle PL/SQL, XML/XSD, .NET, COM/COM+, SOAP, Squeak.

4Team Corporation

Consultant, Support Technician | Jan 2003 - Jun 2003

4Team Corporation is a Microsoft Partner and independent software vendor for enterprises and individuals. With over 12 years of experience, developing software for Microsoft Windows and Add-ins for Microsoft Outlook 4Team served hundreds of thousands customers around the world.

This was my first job in IT, I was performing technical support and customers consultancy for small business utilities.

I was responsible for:

- Consulting customers about functionality of 4Team software
- Solving technical issues, tracking bugs found by customers

PROJECTS

Knowledge Testing Application for driving schools

Software engineer, contractor | May 2011 - Oct 2011

I have designed and implemented web application for testing driving schools' students. It supports managing students, their exams results, generating tests for learning and administrator module for managing exams/learning materials.
